

Nagendra Muralidhar Pulla

Frontend Engineer • Bangalore, Karnataka • nagmurali96@gmail.com • +91 9666756386 • [LinkedIn](#) • [GitHub](#)

Professional Summary

Frontend Engineer with 4.5 years building production web platforms across marketing automation, digital advertising, and design tooling. Primary contributor on multiple products — 89% of a published design-system CLI, 73% of its platform frontend, and 72% of an enterprise email automation platform. Strong on architecture and documented decision-making, with a track record of owning features end to end.

Technical Skills

Languages & Styling: TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Styled-Components, Emotion, shadcn/ui, Radix UI, Material-UI, Ant Design
Frameworks & State: React 19, Next.js 16, Zustand, Redux Toolkit, TanStack Query/Table, React Hook Form, Zod, NextAuth, Storybook
Architecture & Testing: Backend-for-Frontend, REST, Server-Sent Events, OAuth/OIDC (Okta), multi-tenant RBAC, accessibility (a11y), Vitest, Jest, React Testing Library, Playwright
Build & Delivery: Vite, Turbopack, Webpack, pnpm, Docker, Jenkins, GitHub Actions, Contentful, Azure, Sentry, SonarQube, ESLint, Prettier, Husky

Professional Experience

Gale Partners

Frontend Engineer

Apr 2022 – Present

Bangalore, India

HoneyBaked Ham — Website Re-platform (Next.js, Contentful, Azure)

- Owned the complete global navigation system for a legacy Backbone.js to Next.js re-platform — accessible header nav bar with hover and click-lock states, rewards hovercard, category panel, and mobile drawer with slidable sub-categories — as one of **about 12 contributors on a 1,166-commit monorepo**.
- Replaced hardcoded CTAs with a dynamic adapter preserving accessibility attributes; published Storybook as a static site to Azure Blob Storage and authored ADRs on breakpoints and design-token guidelines.

Loom — AI Design-to-Code Platform (CLI, Frontend & Architecture)

- Sole author of `@gale-org/loom-cli` (**89% of commits**), a published npm package installing design-system components from a registry; owned the full release lifecycle across 4 releases and built a non-blocking background update checker on a detached worker, at a **1:1 source-to-test file ratio**.
- Primary contributor to the platform frontend (**73% of commits**, +39.7K lines): implemented Server-Sent Events end to end — proxy route, reusable hooks, live progress UI — plus multi-tenant RBAC and Okta OIDC SSO on NextAuth v5.
- Authored **7 of 8 architecture decision records**, including an SSE snapshot bridge reconciling streamed updates against cached state without race conditions, and a deferred account-switching design eliminating cross-tenant errors.
- Built the architecture proof-of-concept establishing the registry contract — file convention, build step, output schema — adopted by the production design-system repositories.

Weave — Enterprise Email Automation Platform

- Primary contributor (**72% of commits**) on a greenfield build; delivered a 5-step Figma-to-HTML email workflow with gated progression, a dual-mode editor with live preview, and Salesforce Marketing Cloud export.
- Led the migration from a Vite + React Router SPA to Next.js 15 post-MVP, introducing server-side routing, NextAuth authentication, and 50+ typed API route handlers.
- Built the Content Reference File system with live Google Sheets sync, **reducing manual QA effort by roughly 80%** and cutting production cycles from days to hours with zero major production incidents.

Navigator — Multi-Platform Advertising Campaign Management

- Delivered **96 features and 115 fixes** through a full platform revamp spanning two stack generations — 508 commits across 1,913 files (+70.5K lines) — the longest-running engagement of the four.
- Built 19+ Google advertising workflows (Display, Search, YouTube, DV360) plus Meta and TikTok integrations, and designed the budget management system with real-time allocation sliders and multi-currency support.

Education

Full-Stack Web Development Certification | Masai School | Sep 2021 – Apr 2022

B.Tech Mechanical Engineering (CGPA: 8.37/10, First Class with Distinction) | SRKR Engineering College | 2018
